

Partnership for Advancing the Transition to Hydrogen

The International Coalition of Hydrogen Associations

PATH's Annual Report on World Progress in Hydrogen

In today's evolving market economy, finding up-to-date information about the current state of hydrogen and fuel cell technology is often difficult to obtain. Hydrogen programs are advancing at different paces as a result of internal country politics, available resources, and public perception. This presents added challenges to companies looking to expand business opportunities and ventures, impacts local economies, and slows overall momentum for this industry. In response, the Partnership for Advancing the Transition to Hydrogen (PATH) is undertaking a comprehensive assessment of the state of the global hydrogen economy in the form of an Annual Report. The Report aims to be the go-to source for information and data in the world's hydrogen community.

The issues that will be addressed in this Report include:

- Status of PATH associations and accomplishments over the course of the year
- Country Information
 - Production rates
 - Current government funding and initiatives at the industry and university levels
- Market Data
 - Numbers of hydrogen vehicles operating and number of public and private fueling stations
 - Data on hydrogen-fueled off road vehicles like fork lifts
 - Data on hydrogen-fueled power generation in various applications
- Education Statistics
- Events planned for next year
- Public perception of hydrogen energy and the industry overall
- Employment related to the hydrogen industry

The Report has been endorsed for publication by The International Association for Hydrogen Energy, Universiti Teknologi Malaysia City Campus, Canadian Hydrogen and Fuel Cell Association, Deutscher Wasserstoff und Brennstoffzellen-Verband, Association Française de l'Hydrogène and the Italian Hydrogen Forum. It is expected to be completed by June 2011. Industry Sponsorship opportunities remain available! Contact Brian Schorr, Program Manager at 202-457-0076 ext. 309 or bschorr@tccorp.com with questions.
